SUMMARY

Computer Science graduate with a passion for technology, creativity, and building meaningful digital experiences. Motivated to learn, grow, and take on new challenges, with experience across digital projects, UI/UX design, and online community engagement. Committed to continuous improvement and contributing with creativity, adaptability, and strong communication skills in professional environments.

EDUCATION

BACHELOR IN COMPUTER SCIENCE, Faculty of Computer and Information Systems, Islamic University 2025

- Distinguished member of the APET group

Tuwaiq Academy - Drones Programming Bootcamp 2026

- Specialized hands-on training in PX4, Gazebo, ROS 2, MAVSDK, and autonomous drone programming.
- Developed real-time control systems, simulation workflows, and mission-planning algorithms
- Built a full autonomous drone project (Skyline Artifacts) as the final capstone.

Sadia academy 2026

Computer vision

- Developed 'Saudi Street Watch,' a computer vision project identifying public space violations.
- Constructed a detection system for recognizing unauthorized setups and improper placements.
- Managed dataset preparation, model training, and performance evaluation.
- Applied the solution to real-world scenarios for enhanced monitoring and compliance.

PROJECTS

Online Gas Cylinder Sales & Distribution System

Senior Project Islamic University of Madinah

- Developed a full-stack gas cylinder management web application using Flask, MySQL, HTML, and CSS.
- Implemented secure authentication and role-based interfaces for customers, store owners, and administrators.
- Built features for order management, inventory tracking, and system monitoring.
- Applied the Waterfall methodology and produced complete system documentation (ERD, use cases, and activity diagrams).

Skyline artifacts

Tuwaiq Academy - Drones Programming Bootcamp

- Built an autonomous drone survey system using PX4, Gazebo, ROS 2, and MAVSDK.
- Developed mission planning, orbit navigation, and telemetry modules in Python.
- Integrated real-time camera streaming and image processing with OpenCV.

Saudi Street Watch

Sadia Academy - Computer Vision Track

- Built a Computer Vision system for street violation detection using YOLO, Python, and OpenCV.
- Trained custom object detection models with Ultralytics and Roboflow.
- Evaluated and optimized performance using standard detection metrics.

Jabal — Smart Digital Region

Tuawiq academy

- Generated aerial mapping products (Orthomosaic, DSM, DTM, Point Cloud) using Pix4D.
- Conducted GIS-based terrain and hydrological analysis.
- Developed a smart infrastructure plan featuring 19 intelligent facilities.
- Utilized GIS, Remote Sensing, Pix4D, and ArcGIS Pro for planning and visualization.

CERTIFICATES

Python for Beginners

Programming & Software Development

Python 102

Programming & Software Development

Python 104

Programming & Software Development

SQL 101

Programming & Software Development

SQL 103

Programming & Software Development

Seaborn

Artificial Intelligence & Data

Machine Learning Fundamentals

Artificial Intelligence & Data

English Language Certificate

Wall Street Institute

SKILLS

- Logical reasoning and critical thinking.
- Scratch developer
- Java
- C language
- Flutter
- Ability to break down complex problems and design effective solutions.
- Adaptability
- Self-Teaching
- Mobile App Development
- Python
- SQL
- Swift (basics)
- HTML
- Debugging and troubleshooting.
- Public Speaking and Presentation
- Social Media Management

ACHIEVEMENTS

Delivered 12 hours of programming training for children at Orphans Care Charitable Foundation

Leader of the cybersecurity department during CO-OP training

Designed the official posters for the Aman Program Exhibition (Cybersecurity Awareness) at King Salman International Convention Center

Interviewed by APET group

Creator & Editor of GRC in the cybersecurity department at the Islamic University

Golden medal for research on the impact of the Saudi economy on the world (NEOM)

Achieved 1st place among private schools and 8th place in the district in the Arab Reading Challenge

Programming Minecraft Adventurer

Microsoft
